Dacia,

- The same title works.
- I will get you a short Bio/photo/short description to you by the end of the day tomorrow
- Question: Is the picture of me or related to the presentation?
- 19th works: I am free all day.

Thanks,
Ben

Ben,

You do not need to add to your presentation, unless you want to. 30 minutes for your presentation, plus 30 minutes for an introduction (by EPA HQ) and questions for you will work.

Will the title of your presentation be the same as before? Washington's Nutrient Control Strategy

We also need a short bio for you, a photo for the webinar, and a short description of your presentation. These are used for promotional materials we will be sending out very soon.

For the practice session, would you be free on March 19? If so, what times?

Thanks,
Dacia

Thanks Ben – I am not sure what the expectations are since HQ is running the show, but I think ~45 mins would be fine. I attended the first talk, which was about 45 minutes and left a lot of time for discussion. However, I am cc'ing Dacia Mosso and Janice Alers-Garcia, who are coordinating the talks and they can confirm.

Hello Rochelle,

Yes. I have March 24th blocked off. I also owe you guys a call on when I am available for a practice session. One question: how long are you expecting the presentation will run? The webinar is scheduled for 1.5 hours; my current presentation is more around the 30 minute mark. I can add to the presentation but would first like to know what your expectations are.

Thanks,
Ben

Importance: High

Hi Ben,
Sorry to bug you, but I heard from the organizer of the national nutrient webinars that they have not yet received confirmation from you on the details for your talk – can you confirm that all of the below is OK?

They also need to confirm a date to practice with you before the talk – can you let them know when you are available for a practice session prior to your talk?

Thanks so much! Rochelle

SAVE THE DATE EMAIL

EPA's Office of Science and Technology will be sponsoring a Nutrient Webinar Series during FY'15. These webinars will bring together Federal, State, and Tribal water quality scientists to discuss innovative approaches to nutrient criteria development and implementation.

Please save the date for our third webinar!

Presenter: Ben Rau, 319 Program Policy Lead, Washington Department of Ecology

Presentation Topic: Washington's Nutrient Control Strategy

Date/Time: Tuesday, March 24 at 3:00 PM Eastern

Duration of Webinar: estimated 1.5 hours (3:00 to 4:30 PM Eastern)

A summary of the presentation, webinar/call-in information, and other details to follow.
